

SPECIAL VALVES

THE
STANDARD IN
**NON-
STANDARD
VALVES**

GENERAL INFORMATION

This is where Merwede Valves meets the industry in optima forma. As indicated in our title, we are specialized in the production of non-standard valves. “The standard in non-standard valves” and “The specialist for specialties” are two of our slogans which exactly describe who we are, what we do, and where we stand for.

Special valves are essential components in various industrial processes, providing precise control over the flow of fluids, and gases. Unlike standard valves, special valves are designed for specific applications, offering unique functionalities such as high-pressure tolerance, corrosion resistance, precise flow control, and compatibility with specialized fluids.

Seeing our technical possibilities for special valves, it is simply not possible to outline every single valve type within our scope. This is why this brochure gives an impression of where a majority of our special valves are being used.

SUITABLE APPLICATIONS

- Oil & Gas
- Petrochemical industry
- Cryogenic service
- Hydrogen service
- Fertilizer industry
- Fire safe service
- Water & Wastewater management
- Oil Sand grounds
- And many more industries
- Chemical industry
- LNG
- LPG
- Subsea
- Power generation
- Steam service
- HVAC systems
- FPSO's
